

Bias Cutter & Splicer Lines

**Fully Automatic Bias Cutter & Splicer Line 40°- 90°
With optional slitter and strips winding station**

Fully Automatic Bias Cutter Line 90°

Intereuropean has a long experience in design and development of automatic and semi-automatic Bias Cutter and Splicer Lines for steel and textile cord plies.

There are various types of bias cutters with many configuration options:

1. Fully automatic cutting and splicing
2. Automatic cutting and manual splicing
3. Chafer/strips let-off and preassembling in-line
4. Various cutting angle and material width ranges

Every machine configuration is designed according to the customer's specifications.

Fully automatic Bias Cutters and Splicers for PCR tires are available in overlapped splice and butt joint configurations.

Line speeds of up to 18 pcs per minute can be achieved in fully automatic mode.

Manual splicing configurations for low angle cutting lines are equipped with automatic cutting angle and cutting width adjustment systems, vacuum conveyors and auto speed control functions.

**Fully Automatic
Bias Cutter Line 90°**
